BACKGROUND

Screening is the systematic population-based application of a test or inquiry to individuals who do not have symptoms of a specific condition in order to identify those who warrant further investigation and/or intervention to achieve better outcomes. The pillars of systematic screening include education, (offer of) enrolment, test administration, retrieval, treatment or intervention, evaluation and quality assurance/improvement.

Ontario's Prenatal Screening Program (PSP) is housed within BORN Ontario, and is funded by the Ministry of Health and Long Term Care (MOHLTC). Its mandate is to coordinate and oversee the operations of prenatal screening services in Ontario, in order to maintain an integrated program that operates as a "system of care".
